DECLARATION

I undersigned hereby declare that the project report "**Online Thrift Store**", submitted for partial fulfillment of the requirements for the award of degree ofMaster of Computer Applications of the APJ Abdul Kalam Technological University, Kerala is a bonafide work done by me under supervision of **Dr. Rahul Shajan, Assistant Professor, Department of Computer Applications**. This submission represents my ideas in my own words and where ideas or words ofothers have been included, I have adequately and accurately cited and referenced the original sources. I also declare that I have adhered to ethics of academic honesty and integrity and have not misrepresented or fabricated any data or idea or fact or source in my submission. I understand that any violationof the above will be a cause for disciplinary action by the institute and/or the University and can also evoke penal action from the sources which have thus not been properly cited or from whom proper permission has not been obtained. This report has not been previously formed the basis for the award of any degree, diploma or similar title of any other University.

ACKNOWLEDGEMENT

The success of any project depends largely on the encouragement and guidelines of many others. I would like to take this opportunity to express our gratitude to those people who have been instrumental in the successful completion of this project.

First and foremost, I give all glory, honor and praise to **God Almighty** who gave me wisdom and enabled me to complete the project successfully. I also express sincere thanks, from the bottom of my heart, to my parents for their encouragement and support in all my endeavors and especially in this project.

I express my sincere gratitude to **Dr. V.P Devassia, Principal, SJCET, Palai** for giving me the provision to do the project in the required way. I extend my sincere gratitude to **Mr. Anish Augustine K, Head of the Department-Incharge of Computer Science and Applications, SJCET, Palai** who has been a constant source of inspiration and without his tremendous help and support this project would not have been materialized.

I owe a particular debt of gratitude to our internal project guide **Dr. Rahul Shajan Assistant Professor, Department of Computer Science and Applications, SJCET, Palai** for all the necessary help and support that he has extend to me. His valuable suggestions, corrections and the sincere efforts to accomplish my project even under a tight time schedule were crucial in the successful completion this project.

I express my sincere thanks to all the faculties of the department of Computer Applications for their help and encouragement. I thank all my friends, for their inspiration and cooperation. Once again, I convey our gratitude to all those persons who had direct or indirect influence on my work.

Ardra P.Das

ABSTRACT

Nowadays it is not an easy task to make products available which have best quality and are affordable for everyone. Twice But Nice is an online thrift store, the primary goal of this e-commerce site is to ensure the availability of fashion brands with affordable price. People can sell products that they can't use and that are useful to others through this site and there by reduce pollution to some extent by avoid wasting the same. It is hard for one to find an item they desire online as most online stores only sell brand new items.

However, the cost of new products nowadays is very expensive that it hinders people to buy things that they want. Materials used must satisfy an integral set criteria before being accepted to sell in the online store. This site provides any product that people want with the best quality at their fingertips. Also items that are no longer made are often found in thrift stores.

Also, the range of buying a used product online at a second-hand shop is one less item you would need from a retail store. Similarly, thrift fashion reduces the need for mass-produced new products. In recent years, second hand shopping has become extremely popular.

Through this site one can sell unwanted products at reasonable price without harming the environment. The system is able to increase the chance of middle-, and low-income people to have high-quality clothes with affordable prices. It is hard for one to find an item they desire online as most online stores only sell brand new items .Some of the online sites that sell second hand items are not legit.

The available stores sell their items on social media platforms such as Facebook, Instagram and WhatsApp so if you have no prior knowledge of the people on the platforms then it is difficult to find items desired. This site helps people to find their desired product easily.
